

## Texan

### Overview

The Texan profile delivers industrial size with residential finesse. When you need high volume performance and some serious strength but do not want that unsightly industrial appearance, Texan is the answer. This profile will handle just about anything when it comes to downpours.

### Specifier Notes

38 x 4.5mm Aluminium brackets deliver all the strength you will need on a big spouting, and still provide a smooth, faultless finish when powder coated.

### Quick Reference Data

	Cross Section Area	Downpipe size options	Material Availability	Bracket Types	Bracket Material
Texan	20100mm <sup>2</sup>	80mm	0.60mm Copper	External	Aluminium
		100mm	0.5mm ZR8		Copper
			0.5mm ZM8
