INTERNAL GUTTER · CONVERSION SYSTEM

CONFORM

With Conform, we remove your existing fascia and internal spouting and replace them with a system that extends your roofline, new fascia panels and continuous spouting, all while maintaining your home's design aesthetic. It's a much faster process than current solutions and, best of all, your home is left with a watertight rainwater system.

Ideally suited for existing homes with "Klass" or "Taylor" internal gutter systems. Other internal gutter types may also be replaceable — please enquire.

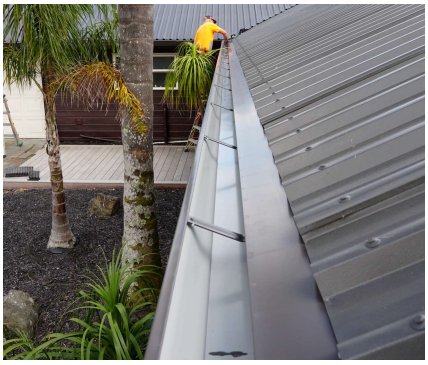

MADE FOR YOUR PLACE SINCE 1991

1. Old fascia & internal gutter system

2. New Conform fascia, with roof extension

3. Conversion completed — Conform fascia & Big Chief spouting

- Converts an internal gutter to an external spouting system
- Returns 95mm under the soffit, covering old downpipe holes
- Height customised to suit the existing roofline
- Overflows distributed outside the building envelope
- Cuts cost — less truss modification, soffit repair and patching
- Pre-painted steel — 15 year perforation, 10 year paint warranty
