GUTTER REINFORCEMENT

SNOW HOOKS

Snow hooks give your rainwater system extra strength — they hook into the spouting bead between the brackets and fix back to the roof, holding the gutter up under snow load.

Ideally suited for snow zones and high wind zones — new builds or retro-fitted to existing spouting. Compatible with Chief and Quartz profiles.

- Hooks into the spouting bead
- Colours to match and blend with your roof*
- Can be retro-fitted
- Designed & manufactured in New Zealand
- 15 year perforation warranty on MagnaFlow steel
- Additional support for high wind zones

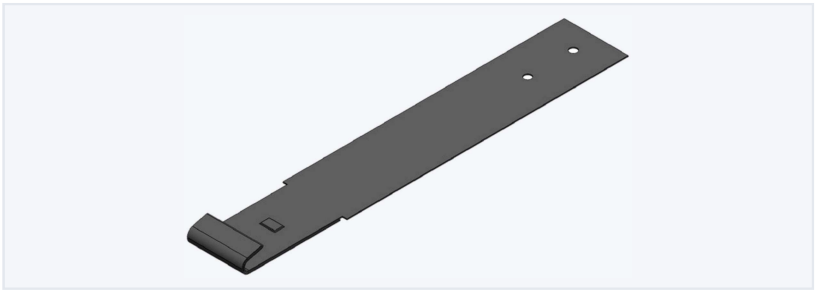

SPECIFY YOUR SNOW HOOKS

FINISH RANGE	BASE MATERIAL	COLOUR CHOICE	HOOK MATERIAL	SNOW LOADING
CG Range	ColorCote MagnaFlow 200gsm	17 CG Colours	MagnaFlow 200gsm	Up to 1.5 kPa**

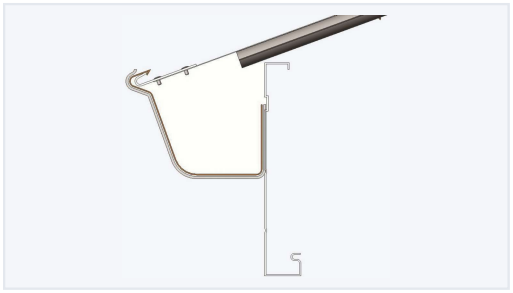

COMPATIBLE SPOUTING
Chief · Quartz

MAXIMUM SPACING
Installed at 600mm centres, between spouting brackets

*Not all roof colours can be matched. For textured metal roof tiles, snow hooks come in a flat finish only. **For snow loading zones and altitudes, refer to NZS 3604 Section 15.
