GUTTER REINFORCEMENT

SNOW STRAPS

Snow straps give your rainwater system extra strength — double-riveted into the spouting bead between the brackets and fixed back to the roof, holding the gutter up under snow load.

Ideally suited for snow zones and high wind zones — new builds or retro-fitted to existing spouting. Compatible with every Continuous Group spouting profile.

- Double rivets into the spouting bead for additional shear loading
- Designed & manufactured in New Zealand
- Colours to match and blend with your roof*
- Additional support for high wind zones
- Can be retro-fitted

SPECIFY YOUR SNOW STRAPS

FINISH RANGE	BASE MATERIAL	COLOUR CHOICE	TIP MATERIAL	SNOW LOADING
CG Range	ColorCote MagnaFlow 200gsm	17 CG Colours	MagnaFlow 200gsm	Up to 2.0 kPa**
Designer Range	ColorCote MagnaFlow 200gsm	25 Designer Colours	MagnaFlow 200gsm	Up to 2.0 kPa**
Copper*	Pure Copper or MagnaFlow 200gsm	Natural Copper	Natural Copper	Up to 2.0 kPa**

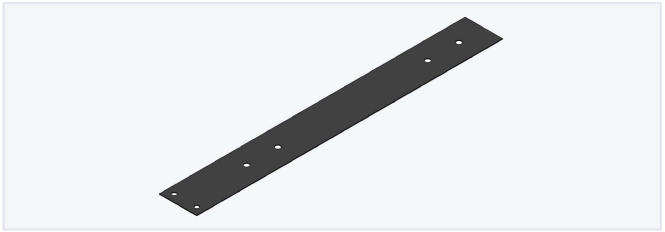

COMPATIBLE SPOUTING

All Continuous Group spouting profiles

MAXIMUM SPACING

Installed at 400mm centres, between spouting brackets

*Not all roof colours can be matched. For textured metal roof tiles, snow straps come in a flat finish only. **For snow loading zones and altitudes, refer to NZS 3604 Section 15.
