175MM · BOX PROFILE

CUBE 175

The Cube 175 profile, like the smaller 125 residential profile, provides a square or box styled profile for a clean finish to your roof line. This larger capacity spouting is ideal for commercial buildings with a larger roof area.

Ideally suited for large commercial or industrial buildings — and it has been used on residential homes too.

Swaging type and position may vary per region.

- Large capacity for heavy rainfall
- Perfect for commercial buildings
- Tough marine-grade materials
- Bracket options to suit
- Up to 15 year material warranty
- Matching downpipes

SPECIFY YOUR CUBE 175

FINISH RANGE	SPOUTING MATERIAL	COLOUR CHOICE	BRACKET MATERIAL	BRACKET OPTIONS

* Limited colours available

DOWNPIPE OPTIONS

80mm, 100mm & 150mm round · 75×55 & 100×55 rectangle

SNOW PROTECTION

Snow straps

Cube 175 is supplied in lengths with straight-line joins — it is not a continuous-run profile.

BUILT FOR THE BIG ROOFS

Cube 175 carries more than two and a half times the water of the residential Cube 125, in the same square box language. Pair it with 150mm round downpipes on the largest catchments — we will size the gutter, brackets and downpipes to the roof.
