300MM · BOX PROFILE

# CUBE 300

The Cube 300 profile, like the smaller 175 commercial profile, gives a square box style and a clean finish to your roof line — with an even larger capacity for water removal. 31,500mm² and 662.6 litres a minute: our largest profile.

**Ideally suited for** industrial and commercial buildings with exceptionally large roof areas, such as warehouses and factories.

Swaging type and position may vary per region.

- Large capacity for heavy rainfall
- Perfect for warehouse buildings
- Tough marine-grade materials
- Bracket options to suit
- Up to 15 year material warranty
- Our largest profile

Cube 300 is supplied in lengths with straight-line joins — it is not a continuous-run profile.

### BUILT FOR THE BIGGEST ROOFS

Cube 300 is the largest profile we make — roughly 63% more capacity again than Cube 175, in the same square box language. Pair it with 150mm round downpipes on warehouse and factory catchments; we will size the gutter, brackets and downpipes to the roof.
